

VENTLIGHT VL-O/2650

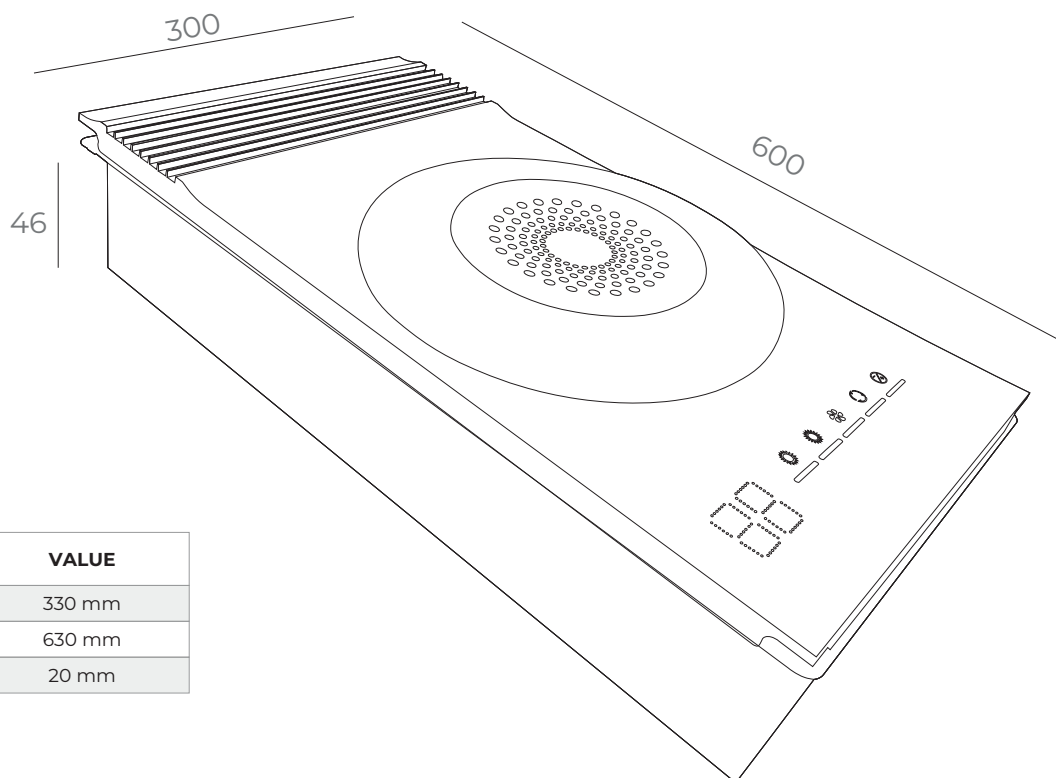

Device features

- An efficient ventilation system ensures effective air exchange, reduces humidity, and improves bathroom comfort. Quiet operation and a modern design guarantee comfortable everyday use.
- The integrated heating function allows you to quickly heat up the room and increase thermal comfort, especially on colder days or after bathing.
- Energy-saving LED lighting provides even and pleasant light. The modern panel combines lighting functionality with aesthetic design.
- Intuitive controls allow for convenient operation of all device functions, such as ventilation, heating, and lighting, without having to approach the device.
- A built-in audio module allows you to wirelessly play music, podcasts, or radio directly from your smartphone or tablet, enhancing the comfort of your bathroom relaxation.
